you trade**

Alerts

In an active marketplace, it pays to know straight away when an investment opportunity arises – even when you're away from your desk.

That's why we've built smartphone push notifications into CommSec alerts. So wherever you are, you'll get instant notifications directly to your devices.

It's easy to set up:

- Simply log into the CommSec app
- Select alerts
- Choose the share you're interested in
- Select the type of alert you want – for example a price alert – and enter the trigger price
- Then select how you'd like to receive the alert

You'll get a notification as soon as your alert is triggered, even when you're out and about.

Any updates you make to your alerts, either via the app or online, will instantly update across all your connected devices. So you can go about your day knowing CommSec has an eye on the market for you.

CommSec alerts – set yours up in seconds today.
