**Tools to help  
you trade**

Trading ideas

A great source of inspiration – our new Trading Ideas section highlights interesting trends, opinions and research.

Stay across the latest broker upgrades and downgrades with the Recommendation Changes module, featuring research from key providers. In the Current Recommendations module you can filter stocks by different views, such as their Buy or Sell rating and their market capitalisation, helping you narrow down your search for stocks of interest.

You'll find more ideas in Investing Strategies, along with suggested criteria for filtering stocks from the expert CBA team. You can quickly identify stocks paying a dividend soon in our Upcoming Dividends area, or find brand new stocks in Upcoming IPOs.

The Stocks to Watch area features companies who have recently released a research report, comparing their performance to the broader sector. Continue down the page to visually compare sectors and identify those outperforming and underperforming the market.

Whatever you explore, you can always quickly return to the main menu to access the full range of markets and research sections.
