How to set a default chart template

- 1. Adjust the chart settings to your desired timeframe, style and any indicators you want included.
- 2. Once you are ready, click on the folder icon in the top left corner and select 'Save template'
- 3. Enter a name, in the below example we called it 'default' and hit save on the bottom right

+ Comparison In	dicator Event ① 6 Month ☶ Daily 4. Candle
Save template	default
Load template	Save your chart settings including indicators, timeframe and styles as a template.
Save chart	Please do not insert any whitespace between characters
Load chart	

- 4. Once saved or if you have a previously saved template you wish to use, click on 'Load template'
- 5. Find the template you want to use and click on the '+' sign

+ Comparison In	ndicator Event 🕓 6 Month	== Daily	₩. Candle
Save template	default	Yesterday	× +
Load template	6mthcandle (Default)	Yesterday	× –
Save chart			ć
Load chart			

6. Confirm you want to set this as your default template by hitting 'Set Default' in the bottom right

ndicator Event 🕓 6 Mon	nth 📅 Daily	싆. Candle
